

From the Chief Editor's Desk

Dear Readers,

I am glad to present the fourth issue of the "Power Research" since we have launched it online. We are look forward for suggestions to improve further.

In December 2019, Central Power Research Institute Bengaluru, organized two International Conferences on "*High Voltage Engineering and Technology - ICHVET 2019*" and "*Recent Trends in Overhead Transmission Line Towers & its Accessories*", at Hyderabad and Bengaluru respectively. This December 2019, issue of Power Research consists few articles selected from these conferences after peer review policy of our Journal. The first five articles are selected from, Recent Trends in Overhead Transmission Line Towers & its Accessories. These articles are in general confined to the latest development on overhead power transmission line tower design, tower testing and evaluation, O&M etc.

Similarly, the next six articles are selected form ICHVET 2019 with primary focus on Dielectric design criterion for High Voltage Bushing Internal Shields in Large Power Transformer, Application of Epoxy with Nano and Micro Fillers for Insulators, Partial Discharge Aged Transformer Oil, Line Surge Arrester Application, Commissioning of UHV Indoor Shielded Laboratory and Switching Capability of Air Insulated High Voltage Disconnectors.

I hope this issue will be informative and beneficial for your professional & research activities. I thank all the author(s) for their valuable contribution to this journal and invite you for considering Power Research for your original research submission through <http://cprijournal.in/>

Wishing you all a happy reading.

(V.S. Nandakumar)
